(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Zak (5,631,814).

Zak discloses an uninterruptible power supply based on non-invasive connection of backup circuit to switch power supply in Fig. 1. A converter system (11) a DC bus having a first conductor (17) and a second conductor (18) a capacitor (19 or 20) coupled between the first conductor and the second conductor a first converter (16) coupled to the DC bus for connection to a utility grid a contactor (14), coupled to the first converter, having an open position a second converter (55) coupled to the DC bus for connection to a load a control power supply (40) coupled to the DC bus an isolation transformer (51), a rectifier (53), coupled between the isolation transformer and the DC bus, that provides rectified voltage to the capacitor and the control power supply when the contactor is in the open position, wherein the rectifier is a full-wave bridge rectifier (16 and 53), a third converter (21), filter (15) and a circuit protection device (60) coupled to the isolation transformer.
